

# **ELAFLEX Product ID App**- Sample Codes -

In May 2018, Elaflex launched the Product ID App for refuelling equipment.

After its installation (iOS or Android) the user can scan the Data Matrix Code to identify Elaflex products and access general technical information and certificates, without login.

Registered users have access to additional functions, e.g. product location and history, reporting, maintenance and inspections scheduling.

So far, all new articles from the following product groups of ELAFLEX HIBY Tanktechnik already bear a unique Data Matrix Code:

- service station nozzles and accessories
- service station hose assemblies

Elaflex continuously improves the app and will post updates.

Below please find some sample codes for testing.

May 2019 Information 3.19 E

## Using the Elaflex Product ID App - Example: LPG 16 Hose Assembly

(As an option to scanning the code you can also manually enter the serial number of the product.)

### Without Login:

After scanning the Data Matrix Code the app will show general technical information and certificates.

#### For registred users:

Access to additional functions, e.g. product location and history, reporting, maintenance and inspection scheduling for officials and service personnel. Data is saved on your device or can be sent by E-Mail. The App complies with the European Data Protection Regulation.

#### **Additional Information**

Under elaflex.de/en/ProductID you will find the Elaflex Product ID App Flyer, and the link to the Product ID App for iOS or Android. Please contact dewald@elaflex.de for any problems or feedback.
